CUMULATIVE INDEX – VOLUMES 1-5

Subject Index

Active Vibration Control

Active Control of Structurally-Coupled Sound Fields in Elastic Cylinders by Vibration Force Inputs. J. D. Jones and C. R. Fuller. 5(3):123-140; Jul 1990.
Limiting Performance for the Control of Large Vibrating Structures by a Modal Approach. B. P. Robertson and W. D. Pilkey. 2(1):32-37; Jan 1987.
Reduction of Interior Sound Fields in Flexible Cylinders by Active Vibration Control. J. D. Jones and C. R. Fuller. 4(2):45-50; Apr 1989.

Analytical Methods

Annular Plate Response to Circumferentially Moving Loads with Sudden Radial Position Changes. G. N. Weisensel and A. L. Schlack, Jr. 5(4):239-250; Oct 1990.

Curvature Coupling of Catenary Cable Equations. G. A. Nariboli and K. G. McConnell. 3(2):49-56; Apr 1988.

Dynamic Stiffness and Nonconservative Modal Analysis. A. Y. T. Leung. 4(3):77-82; Jul 1989.

Effective Approach to Determine Natural Frequencies and Mode Shapes of Constrained Beams Using Langrange Multipliers. Z. Zeng, T. Huang, and J. F. Hamilton. 5(2):109-114; Apr 1990.

Flexural Waves in Beams with Periodic, but Piecewise Constant, Impedance. S. Y. Lee and M. J. Kao. 4(4):124-130; Oct 1989.

Mechanical-Structure Improvement by Dynamic-Stiffness Methods. D. I. G. Jones and A. Muszynska. 2(2):83-91; Apr 1987.

Mobility Analysis of Helical Coil Springs. Y. S. Ünlüsoy. 3(3):96-100; Jul 1988.

Random Structural Response of a SDF System with Stiffness Degradation. S.-L. Lu and F. D. Ju. 5(4):251-260; Oct 1990.

Solution to the Craig/Bampton Eigenvalue Problem for Multicomponent Structures. R. C. Engels. 1(2):19-24; Apr 1986.

Spectrally Formulated Element for Wave Propagation in 3-D Frame Structures. J. F. Doyle and T. N. Farris. 5(4):223-237; Oct 1990.

Transient Vibration Analysis of Nonproportionally Damped Linear Structures Using Modal Parameters. T. Abrahamsson and M. Lundblad. 3(3):108-114; Jul 1988.

Analytical Modal Analysis

Alternative Method for SDOF Modal Analysis. D. J. Ewins and A. F. Vakakis. 4(4):144-149; Oct 1989.

Effective Approach to Determine Natural Frequencies and Mode Shapes of Constrained Beams Using Lagrange Multipliers. Z. Zeng, T. Huang and J. F. Hamilton. 5(2):109-114; Apr 1990.

Case Histories

Vibration Analysis of the Yamachiche Lightpier. F. D. Haynes. 1(2):9-18; Apr 1986.

Damping

Damping in Alumininum-Filled Epoxy Using Two Different Flexural-Testing Techniques. J. D. Rogers and K. G. McConnell. 1(4):8-17; Oct 1986.

Damping Ratios for Multiple Degree of Freedom Linear Systems. D. J. Inman and B. L. Jiang. 2(1):38-42; Jan 1987.

Determining Damping Mechanisms in a Composite Beam by Experimental Modal Analysis. H. H. Cudney and D. J. Inman. 4(4):138-143; Oct 1989.

Experimental Techniques for Modeling Nonlinear Stiffness and Damping Characteristics. R. Stanway and J. E. Mottershead. 4(3):89-92; Jul 1989.

Extrapolation of Modal-Analysis Techniques to Nonlinear Damped Systems. D. J. Dimas and G. C. Pardoen. 3(3):81-88; Jul 1988.

Input and Damping Identification Within the Frequency Domain. H. G. Natke. 2(2):92-98; Apr 1987.
Modal Testing of Circular Plates with Partial Viscoelastic Damping Treatments. K. K. Stevens and J. B. Lopes. 1(1):1-10; Jan 1986.

Data Analysis Techniques

Application of the Fast-Fourier Transform (FFT) to Wave-Propagation Problems. J. F. Doyle. 1(4):18-25; Oct 1986.
Application of the Narmax Method to Nonlinear Frequency-Response Estimation. S. A. Billings, K. M. Tsang and G. R. Tomlinson. 4(3):97-102; Jul 1989.
Estimates of Variance and Confidence Bands for the Three-Channel Frequency Response Function Estimator. R. E. Cobb and L. D. Mitchell. 5(3):185-194; Jul 1990.
Ill-Conditioned Nature of Indirect Force-Measurement Techniques. J. M. Starkey and G. L. Merrill. 4(3):103-108; Jul 1989.
Method for the Unbiased Estimate of System FRFs in the Presence of Multiple-Correlated Inputs. R. E. Cobb and L. D. Mitchell. 3(4):123-128; Oct 1988.
Methods for the Estimation of Frequency-Response Functions in the Presence of Uncorrelated Noise, A Review. A. L Wicks and L. D. Mitchell. 2(3):109-112; Jul 1987.
Multiple Single-Input Space-Time Regression Method in Modal Analysis. T. C. Huang, P. Q. Zhang and W. Q. Feng. 1(4):1-7; Oct 1986.
Signal Processing and the Fast-Fourier-Transform (FFT) Analyzer–A Survey. L. D. Mitchell. 1(1):24-36; Jan 1986.
Simplified Method for Extracting Rotational Degree-of-Freedom Information from Modal Test Data. B. S. Haisty and W. T. Springer. 1(3):35-39; Jul 1986.
Unbiased Frequency-Response-Function Estimator. L. D. Mitchell, R. E. Cobb, J. C. Deel and Y. W. Luk. 3(1):12-19; Jan 1988.

Experimental Techniques

Dynamic Calibration of Measurement Systems for Use in Modal Analysis. K. G. McConnell and M. K. Abdelhamid. 2(3):121-127; Jul 1987.
Eliminating Indirect Analysis–The Potential for Receptance Sensitivities. J. A. Brandon. 2(2):73-75; Apr 1987.
Experimental Techniques for Modeling Nonlinear Stiffness and Damping Characteristics. R. Stanway and J. E. Mottershead. 4(3):89-92; Jul 1989.
External-Intensity-Modulated Fiber-Optic Sensors for Structural-Vibration Measurements. M. E. Patton and M. W. Trethewey. 3(4):137-147; Oct 1988.
Vibration and Chatter Analysis of an NC Lathe. J. M. Lee, S. Y. Lee and H. Lee. 4(1):19-24; Jan 1989.

Finite Element Analysis

Application of Finite Element Method to the Stability of an Eccentrically Loaded Column by Slave Loads Including Damping. C. M. Arif and O. Pettersson. 5(3):141-154; Jul 1990.
Finite Element Analysis of Free Vibrations of Laminated Composite Plates. M. J. Kim and A. Gupta. 5(3):195-203; Jul 1990.

New Triangular Finite Element for the Analysis of Free Vibration of Plates. G. Abu-Farsakh and N. Khader. 2(3):136-143; Jul 1987.

Review of Time-Domain and Frequency-Domain Component-Mode Synthesis Methods. R. R. Craig, Jr. 2(2):59-72; Apr 1987.

Spectrally Formulated Finite Element for Flexural Wave Propagation in Beams. J. F. Doyle and T. N. Farris. 5(2):99-107; Apr 1990.

Spectrally Formulated Finite Element for Longitudinal Wave Propagation. J. F. Doyle. 3(1):1-5; Jan 1988.

Finite Element Analysis & Testing

Correction of a Finite-Element Model by Input-Output Measurements with Application to a Radar Tower. C. Hoff and H. G. Natke. 4(1):1-7; Jan 1989.

Linking Analysis & Testing

Analytical and Experimental Study [Analysis] of Inextensional Modes of a Circular Cylinder. C. L. Shen, Y. G. Tsuei, R. J. Allemang and D. L. Brown. 1(4):26-32; Oct 1986.

Analytical Stiffness Matrix Correction Using Measured Vibration Modes. J. He and D. J. Ewins. 1(3):9-14; Jul 1986.

Finite-Element Analysis and Modal Testing of a Rotating Wind Turbine. T. G. Carne, D. W. Lobitz, A. R. Nord and R. A. Watson. 3(1):32-41; Jan 1988.

Linking Finite Elements with Experimental Modal Analysis. M. Hermanski and H. Ostholt. 2(3):144-147; Jul 1987.

Localization of Model Errors in Optimized Mass and Stiffness Matrices Using Modal-Test Data. J. C. O'Callahan and C.-M. Chou. 4(1):8-14; Jan 1989.

PARADYM – a Parameter Refinement Computer Code for Structural Dynamic Models. I. U. Ojalvo, T. Ting and D. Pilon. 5(1):43-49; Jan 1990.

Transient Analysis of a Structure Using a Modal Model. T. M. Gaught and B. J. Dobson. 1(1):11-16; Jan 1986.

Modal Test Methods

Characteristic Behavior of Random and Systematic Errors in Inverse Plane Frequency Identification Algorithms. J. Brandon. 5(4):205-212; Oct 1990.

Dynamic Analysis of Assembled Structures Using Frequency-Response Functions: Improved Formulation of Constraints. P. O. Larrson. 5(1):1-12; Jan 1990.

Experimental Strain Modal Analysis by Space-Time Regression Method in the Time Domain. T.-X. Song, P. Q. Zhang, W. Q. Feng and T. C. Huang. 4(1):15-18; Jan 1989.

Mathematical Correlation of Modal-Parameter-Identification Methods via System-Realization Theory. J.-N. Juang. 2(1):1-18; Jan 1987.

Modal Characteristics of Structures from Transient-Response Data. P. F. Cunniff and G. J. O'Hara. 2(4):180-191; Oct 1987.

Modal-Parameter Extraction for Nonproportionally Damped Linear Structures. T. Abrahamsson. 3(2):62-68; Apr 1988.

Modal-Parameter Quality Assessment from Time-Domain Data. G.-M. Lee and M. W. Trethewey. 3(4):129-136; Oct 1988.

Modal Strain/Stress Fields. O. Bernasconi and D. J. Ewins. 4(2):68-76; Apr 1989.

Modal Testing of Circular Plates with Partial Viscoelastic Damping Treatments. K. K. Stevens and J. B. Lopes. 1(1):1-10; Jan 1986.

Multiphase-Step-Sine Method for Experimental Modal Analysis. R. Williams and H. Vold. 1(2):25-34; Apr 1986.

Multiple-Input Experimental Modal Analysis – A Survey. R. J. Allemang and D. L. Brown. 1(1):37-44; Jan 1986.

On-line Extraction of Offshore Tower Vibration Parameters from Response Measurements. K. A. F. Moustafa. 4(3):83-88; Jul 1989.

Qualification of Frequency-Response Functions Using the Rigid-Body Response. D. O. Smallwood and J. P. Lauffer. 5(2):115-122; Apr 1990.

Reducing the Effects of Residual Modes in Measured Frequency-Response Data. I. Ahmed and G. R. Tomlinson. 2(3):113-120; Jul 1987.

State-Space Formulation of Multi-Shaker Modal Analysis. R. R. Craig, Jr., A. J. Kurdila and H. M. Kim. 5(3):169-183; Jul 1990.

Survey and Assessment of Nonintrusive-Modal-Testing Techniques for Ultralightweight Structures. M. E. Patton and M. W. Trethewey. 2(4):163-173; Oct 1987.

Test-Analysis-Model Development Using an Exact Modal Reduction. D. C. Kammer. 2(4):174-179; Oct 1987.

Use of Principal Inputs in Multiple-Input Multiple-Output Data Analysis. J. Leuridan. 1(3):1-8; Jul 1986.

Using Vibratory and Modal Analysis to Reduce Vibrations and Noise in an Automotive Engine. C. Braccesi, M. Carfagni and P. Rissone. 3(3):89-95; Jul 1988.

Modal Test Methods & System Identification

Application and Evaluation of Multiple-Input Modal-Parameter Estimation. F. Lembregts, R. Snoeys and J. Leuridan. 2(1):19-31; Jan 1987.

Application of Impact Testing in the Modal Analysis of a Large Structure. Q.-Z. Huo and D.-J. Zhang. 3(2):57-61; Apr 1988.

Application of Modal-Parameter Estimation Using Frequency-Domain Algorithms. P. Ebersbach and H. Irretier. 4(4):109-116; Oct 1989.

Characteristic Behavior of Random and Systematic Errors in Inverse Plane Frequency Identification Algorithms. J. Brandon. 5(4):205-212; Oct 1990.

Comparison of Some Time-Domain-System Identification Techniques Using Approximate Data Correlations. J. E. Cooper. 4(2):51-57; Apr 1989.

Detection of Sudden Changes of Modal Parameters in Machinery. M. R. Kujath. 4(4):131-137; Oct 1989.

Identification of Journal Bearing Modal Parameters. K. A. F. Moustafa and K. R. Asfar. 5(4):213-221; Oct 1990.

Modal Testing an Immense Flexible Structure Using Natural and Artificial Excitation. T. G. Carne, J. P. Lauffer, A. J. Gomez and H. Benjannet. 3(4):117-122; Oct 1988.

Modal Testing of Rotor/Bearing Systems. A. Muszynska. 1(3):15-34; Jul 1986.

Obtaining Mass Participation Factors Using 'Equivalent' Structures. V. C. Matzen and C. E. Murphy. 1(1):17-23; Jan 1986.

Performance Evaluation of Machine-Tool Structures Using Modal Analysis. K. H. Chua, M. Rahman and M. A. Mansur. 2(1):43-49; Jan 1987.

Perspective View of Modal Analysis. L. D. Mitchell. 3(2):45-48; Apr 1988.

Structural-Dynamics Identification in the Time Domain: Estimation of Modal Parameters Based on Forced Vibrations. U. Füllekrug. 4(2):58-67; Apr 1989.

Structural Modification and Modal Analyses – A Survey. V. W. Snyder. 1(1):45-52; Jan 1986.

Studies of Modal-Identification Performance Using Hybrid Data. R. S. Pappa and J.-N. Juang. 2(2):99-108; Apr 1987.
System Identification of Nonlinear Damaged Structure. M.-L. Wang, T. L. Paez and F. D. Ju. 2(3):128-135; Jul 1987.
Transient Analysis of a Structure Using a Modal Model. T. M. Gaught and B. J. Dobson. 1(1):11-16; Jan 1986.
Vibration Analysis of the Yamachiche Lightpier. F. D. Haynes. 1(2):9-18; Apr 1986.
ZMODAL: A New Modal-Identification Technique. F. Léonard. 3(2):69-76; Apr 1988.

Model Substructuring

Component Synthesis Method Using Lanczos Vectors. J. J. Allen. 4(2):33-38; Apr 1989.
Dynamic Substructure Algorithm to Investigate the Feasibility of Adaptable Engine Mounts. J. M. Starkey and A. M. Durchholz. 3(1):26-31; Jan 1988.
Experimental Substructure Synthesis with Special Consideration of Joints Effects. J. H. Wang and C. M. Liou. 5(1):13-24; Jan 1990.
Fixed-Interface Substructural Modal Perturbation Method. T. C. Huang and X. L. Huang. 3(1):6-11; Jan 1988.
Review of Time-Domain and Frequency-Domain Component-Mode Synthesis Methods. R. R. Craig, Jr. 2(2):59-72; Apr 1987.
Turbine Design Using Complex Modes and Substructuring. H.-L. Olausson and B. J. Torby. 3(4):148-157; Oct 1988.

Modeling

Annular Plate Response to Circumferentially Moving Loads with Sudden Radial Position Changes. G. N. Weisensel and A. L. Schlack, Jr. 5(4):239-250; Oct 1990.
Comparison Between Model-Optimization Procedures Based on the Model-Optimization Parameter Set. T. Janter, W. Heylen and P. Sas. 4(3):93-96; Jul 1989.
Modeling Cylinder Acoustics of Flexural and Shell Modes. F. Ismail and K. R. Fyfe. 5(1):25-32; Jan 1990.
Modeling of the Dynamics of a Continuous Beam Including Nonlinear Fatigue Crack. A. Ibrahim, F. Ismail and H. R. Martin. 2(2):76-82; Apr 1987.
Random Structural Response of a SDF System with Stiffness Degradation. S.-L. Lu and F. D. Ju. 5(4):251-260; Oct 1990.

Non-Destructive Testing

Diagnosis of Fracture Damage in Frame Structures (A Π-Circuit Analogy). M. Akgun and F. D. Ju. 2(4):155-162; Oct 1987.
Diagnosis of Multiple Cracks on a Beam Structure. M. Akgun and F. D. Ju. 2(4):149-154; Oct 1987.
Diagnostic Experimental Spectral/Modal Analysis of a Highway Bridge. M. Biswas, A. K. Pandey and M. M. Samman. 5(1):33-42; Jan 1990.
Global Damage Detection in Solids – Experimental Verification. N. Stubbs and R. Osegueda. 5(2):81-97; Apr 1990.
Global Non-Destructive Damage Evaluation in Solids. N. Stubbs and R. Osegueda. 5(2):67-79; Apr 1990.
Incipient Failure Detection from Random-Decrement Time Functions. S. R. Ibrahim. 1(2):1-8; Apr 1986.

System Identification of Nonlinear Damaged Structure. M.-L. Wang, T. L. Paez and F. D. Ju. 2(3):128-135; Jul 1987.

Weighted-Error-Matrix (WEM) Application to Detect Stiffness Damage by Dynamic-Characteristic Measurement. Y.-S. Park, H. S. Park and S. S. Lee. 3(3):101-107; Jul 1988.

Nonlinear Dynamics

Nonlinear Structural Structural Dynamics of Space Manipulators with Elastic Joints. H. S. Tzou. 4(4):117-123; Oct 1989.

Rotor Dynamics

Annular Plate Response to Circumferentially Moving Loads with Sudden Radial Position Changes. G. N. Weisensel and A. L. Schlack, Jr. 5(4):239-250; Oct 1990.

Asynchronous Harmonic Response Analysis of Roter Bearing Systems. C.-W. Lee and S.-W. Hong. 5(2):51-65; Apr 1990.

Identification of Journal Bearing Modal Parameters. K. A. F. Moustafa and K. R. Asfar. 5(4):213-221; Oct 1990.

Modal Testing of Rotor/Bearing Systems. A. Muszynska. 1(3):15-34; Jul 1986.

Optimization of Vibration Frequencies of Rotors. V. Steffen, Jr. and J. L. Marcelin. 3(3):77-80; Jul 1988.

Seismic Topics

Dynamic Response of Secondary Systems in Structures Subjected to Earthquake Excitation. A. G. Hernried and K.-S. Lau. 3(1):20-25; Jan 1988.

Structural Dynamics Modification

Prediction of Mass Modification for Desired Natural Frequencies. Q. Zhang, W. Wang, R. J. Allemang and D. L. Brown. 4(2):39-44; Apr 1989.

Structural Dynamic Optimization Using Reanalysis Techniques. B. P. Wang. 2(1):50-58; Jan 1987.

Why Be Modal: How to Avoid the Use of Modes in the Modification of Vibrating Systems. A. Sestieri and W. D'Ambrogio. 4(1):25-30; Jan 1989.

Transducers and Instrumentation

External-Intensity-Modulated Fiber-Optic Sensors for Structural-Vibration Measurements. M. E. Patton and M. W. Trethewey. 3(4):137-147; Oct 1988.

Scanning Laser Doppler Vibrometer for Modal Testing. P. Sriram, J. I. Craig and S. Hanagud. 5(3):155-167; Jul 1990.
